**Restricted Stock Systems Announces Second Consecutive Record Quarter**

*Insider Trading Software Company Signs Six New Customers and Upgrades its  
Flagship Rule 10b5-1 Compliance Platform*

**PRINCETON, N.J. – July 24, 2007** – Restricted Stock Systems, a leading provider of insider trading software and services to brokerage firms and publicly traded companies, announced today a record second quarter, bringing its total customer roster to 51. In addition, the company unveiled key upgrades to its 10b5-1 Plan Manager platform, further advancing compliance goals for brokerage and corporate customers.

The company signed six new clients this quarter, all of whom recognized the need to significantly enhance the management of their insider trading disclosures.

Restricted Stock Systems also upgraded its flagship 10b5-1 Plan Manager platform to provide its brokerage clients more powerful tools to manage and execute 10b5-1 trading plans. Against the backdrop of continued 10b5-1 plan adoption, Restricted Stock Systems extended the features of RSS 10b5-1 Plan Manager to include:

- Enhanced 10b5-1 features allowing management of an even wider range of trading plans
- Updated interface to support Algorithm and formula driven trading plans
- New corporate action interface to better manage grants and stock splits

“Our record second quarter underscores that insider trading compliance continues to be an area of intense focus for all financial institutions and corporations,” said Greg Besner, chief executive officer, Restricted Stock Systems.

**About Restricted Stock Systems:**

Restricted Stock Systems, Inc. provides the industry’s only commercial software to manage Rule 10b5-1 trading plans in addition to software and services for processing and reporting of restricted stock and insider trading compliance. Offering the most comprehensive trade management and compliance solutions available, Restricted Stock Systems enables public companies and financial institutions to simplify the collection and verification of shareholder information, automate required filings and streamline compliance processing and reporting.

With software and services to support Rule 10b5-1, Rule 144, Venture Capital distributions and Forms 3, 4 and 5, Restricted Stock Systems' insider trading and compliance solutions are used by many leading financial firms and Fortune 500 companies.
